Create Your Shipping Offering With Speed And Flexibility

- Access the most reliable APIs for parcel shipping from one platform instead of having to build it yourself.
- Deploy EasyPost's pre-made customer portals or embed our UI components to shorten development time, reduce costs, and deliver immediate business value.
- Centralize postage payment to your account for full control over your customers' experience or rely on EasyPost to reduce overhead.

Manage Sub Accounts With Ease

- Create, group, and manage sub accounts code free through the Forge dashboard.
- Set sub accounts to inherit platform-wide settings or customize each one's carrier access and branding.
- Monitor sub account or platform level API uptime, response time, webhook error rates, and more to quickly troubleshoot performance concerns.
- Find Production and Test API Keys for all sub accounts and ditch the sticky notes.
- Share Forge access across your team and apply role-based permissions.

Open New Revenue Lanes

- Adjust customer facing shipping rates with FlexRate and generate revenue on every label.
- Generate revenue by marking up EasyPost's low-cost shipping insurance to your sub accounts.
- Recoup lost revenue with automated USPS claims filing on behalf of your sub accounts.
- Support your sub accounts by providing Luma's strategic AI-powered shipping recommendations, growing your business alongside theirs.

The screenshot displays the GUARD dashboard interface. On the left is a sidebar menu for the FORGE platform, including sections for Management (Dashboard, Guard Insurance, Sub Accounts, Reports, Carriers, Billing, Branding, Members, Account Settings) and Development (Luma Select, API Keys, Webhooks). The main dashboard area is titled 'GUARD' with a 'Production' dropdown. It features several key metrics: 'EasyPost Insurance' with 0 Protected Shipments, 0 Total Claims, and \$0.00 Reimbursed; 'Shipment Values' with 0 Missing Order Value; and 'Carrier Claims' with 0 USPS Claims and 0 Reimbursed. A toggle switch for 'Automatically Buy Shipping Insurance for ALL shipments' is shown as disabled. Below these are sections for 'EasyPost Insurance Claims' and 'USPS Claims'. A 'FlexRate' modal window is open in the foreground, titled 'Specific Carrier Adjustment', allowing users to set adjustment amounts for different carriers and services. It includes three rows for Carrier Scoping (USPS, FEDEX, UPSDAP) with corresponding Adjustment Amounts (\$3.00, \$2.00, and \$1.50). The modal has 'Cancel' and 'Save Rules' buttons at the bottom right.
